

4200 SERIES LUMINOX WATCH

The ALWAYS VISIBLE function whether on water, in the air or on land is powered by an innovative Luminox Light Technology (LLT), a self-powered illumination system that utilizes tritium: tiny micro gas light tubes to create ultimate visibility in complete darkness, under any conditions. This unique and advanced Swiss technology allows the watches to ensure at-a-glance visibility, meaning the watches provide a constant glow 24/7 for up to 25 years.

Features

- Screw in case back creates tighter seal
- Screw in crown for setting time / date
- Luminox self-powered illumination
- Unidirectional ratcheting bezel.
- Anti-reflective sapphire crystal
- Multi jewel Swiss quartz movement
